PROJECTIONS of Cases using current Trend to 15th Nov (target Herd Immunity from Vaccination)

- If the trend of new cases continue, we could end up around 20 times the number of current cases by 15th November - That is then we target to achieve Herd Immunity from Vaccination in NSW
- It is critical that we contain the outbreak and reduce the daily number of new cases immediately to
 avoid this, 20 times the ICU beds is a lot more than the ICU bed capacity in NSW -- that could cause
 20 times the number of deaths as well
- If the number of new cases start to lower later this week, it is still possible that they could gradually reduce to a manageable volume (<30 daily) by 1st week in Oct - THIS LOCKDOWN MUST WORK!
